

DHZ-A7000 COMMERCIAL CURVE TREADMILL

The **DHZ Fitness A7000 Curve Treadmill** gives the user 100% control over the workout process, providing an easy transition between different running speeds and paces. The Curve Treadmill is an excellent running platform. A mileage of 150,000 miles (240,000 km) is done without a single replacement of the running belt (moving belt) or platform parts. Plus, since the treadmill doesn't have a motor, you don't need to worry about any electrical component replacement.

SPECIFICATION	
MODEL	DHZ-A7000
ENGINE	Non-Motorized / No Accelerators
SPEED	Unlimited
DISPLAY	Calories, Distance, Time
