

## BIO-ARC TECHNOLOGY:

- Head pad position helps prevent hyperextension of users neck.
- Independent individual handles allows natural arc pattern and movement of joints, limiting joint stress.
- The user's entire body moves along a linear arc trajectory with the machine.
- 245 lbs. weight stack: weight lifted is the approximate combined user's weight and weight selected (see Weight Guide label).

Ht: 58 in/147 cm  
Wt: 610 lb/277 kg
