

LK7200 – Upright Bike

H720BM

The LK7200 is BH most accessible and comfortable upright bike. With this machine, each user will get the most natural position, thanks to horizontal and vertical seat adjustment. Its ergonomic design helps align hip, knee and pedals.

Accessibility without limits

All the obstacles between the seat and handlebar have been eliminated in order to promote an easier access.

Poly-V Belt

Transmission System: Poly-V belt drive assures performance that is smooth, quiet, and low maintenance. No Chain means you and the bike stay cleaner with no oiling.

	Weight of machine	59 kg / 130 lbs.
Other	Other	Box frame. Perfect alignment between saddle and pedals

Perfect synergy between saddle and pedals

An ergonomic design that helps to align hips, knees and pedals. With a short distance between the pedals heightens comfort.

Fully covered protection

The fully protected moving components and the box frame design are specially designed for greater user safety and less maintenance.

Monitored heart rate

Measured either by contact with the handlebar or via telemetry (Integrated POLAR compatible receiver).
